

Carbon Capture & Storage (CCS)

Market Leading Inland Water Barge Rig Provider
for Wellbore Construction Projects

 **PARKER**
WELLBORE

Energy. Well engineered.

It is crucial to capture and store CO₂ in order to effectively reduce the amount of carbon dioxide in the atmosphere. At Parker Wellbore, we partner with customers interested in capturing and storing point source industrial CO₂ emissions.

KEYS TO SUCCESS

Engineering & Technology

Machine Shops

- Licensed Thread Cutting
- Fabrication & Repair
- Tool redress
- Manufacturing
- Inspection
- Tubular Management Services

Product Sales

- Hydro-Mechanical Whipstocks

U.S. GULF COAST

Parker Wellbore is the premier barge rig provider in the U.S Gulf Coast for wellbore construction solutions. We are one of the few companies in North America with barge rigs in inventory and ready to operate today. Our CCS focus is in shallow waters servicing customers with the construction of test, monitoring, and injection wells for CCS projects.
