

Parker's KSA Machine Shop Successfully Manufactured 310 SUBS & 3048 Coupling Blanks with ZERO Rejection

Value to Our Clients

Our dedicated KSA Machine Shop manufactured 310 SUBS (158 for ADC, 74 for slb & 78 for other clients) and 3048 coupling blanks (Arcelor Mittal) with ZERO rejection. With locations worldwide, our team can handle your manufacturing, repairs, and inspection needs. Parker offers the latest technology and highly skilled and experienced machine shop personnel.

Parker's Couplings

Challenges:

- Detect defects and reduce rejections to zero in SUBS and couplings for our clients.
- Meeting client's request of reducing time and avoiding imperfections in our cuttings and couplings.

Solutions:

- Provide raw materials, manufactured in our KSA machine shop.
- Performed 100% of the cuttings and manufacturing processes applying rigorous quality control measures.

Results:

- Parker's Machine Shop in KSA gained the clients' trust in manufacturing services to manufacture and deliver SUBS & couplings with zero rejection and on-time delivery.
- Saved our client additional expenses by reducing manufacturing time with zero defects.
- We saved our customer 17% on the logistic costs by performing the job at our machine shop.
