

WHIPSTOCK

Easy-Trak Casing Exit System

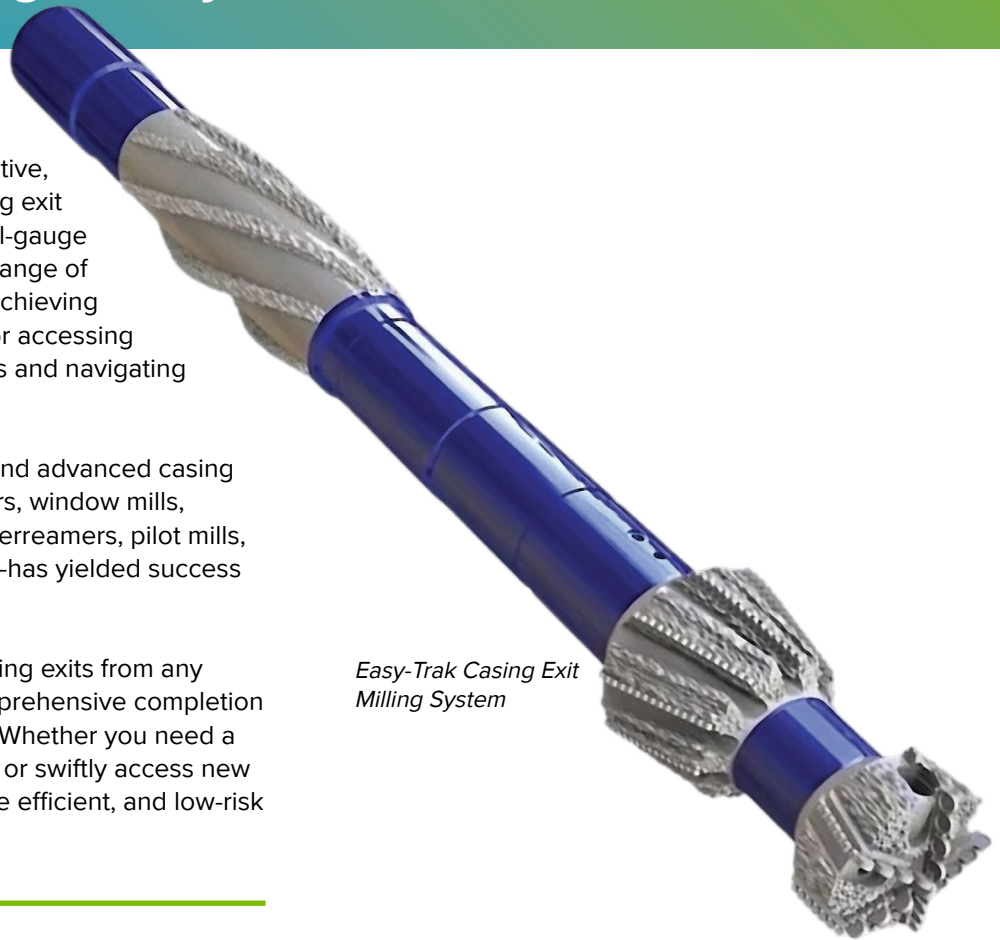

Value to Our Customers

Parker Wellbore offers swift, effective, dependable, and adaptable casing exit systems that facilitate one-trip, full-gauge window cutting across a diverse range of formations and hole conditions. Achieving proficient casing exits is pivotal for accessing previously uneconomical reserves and navigating challenging situations.

Leveraging our global expertise and advanced casing exit technology—including anchors, window mills, retrieving tools, section mills, underreamers, pilot mills, whipstocks, and accessory tools—has yielded success in hundreds of wells.

We can provide class-leading casing exits from any steel type, allowing for more comprehensive completion options with full-gauge windows. Whether you need a casing exit to address challenges or swiftly access new reserves, we ensure a faster, more efficient, and low-risk solution for your requirements.
