

# Norway Machine Shop Met Critical Delivery Time for Lift Nipples, Manufactured with Norsok Specs for Tubing

## Challenge:

- The customer required specialized 25 ea Lift Nipples with TSH wedge to be manufactured within 7 days for urgent delivery.

## Solutions:

- We worked closely with the steel supplier to ensure rapid delivery of the raw material, which was delivered to our site within one day and ready for manufacture.
- We demonstrated our adaptability by swiftly adjusting the planned output, ensuring the timely production of these specialized items within the given timeframe.
- Once received at the Parker site, all pallets were located next to our SL 75 machine, ready to be manufactured.

## Results:

- The new Lift Nipples were delivered a remarkable 3 days before the agreed delivery date, surpassing both the customers' and end users' expectations.
- By meeting the tight timeline, we proved our ability to quickly respond to our customer's urgent needs and deliver the needed equipment.

## Wedge 511®

Outside Diameter – 3,500 inches
