

Aberdeen Machine Shop Manufactured Sub Packages Reducing Lead Time and Saving Rig Downtime

Value to Our Clients

Our dedicated Aberdeen machine Shop manufactures premium X-Over Subs per the required NS-1 specifications for North Sea use. With locations worldwide, our team can handle your manufacturing, repairs, and inspection needs. Parker offers the latest technology and highly skilled and experienced machine shop personnel.

Challenges:

- The end user changed the configurations and increased quantities mid-way into the job.
- Parker was not on the customer approved vendors list for scope, however given PW's extensive track history and high reputation, this was granted.

Solutions:

- Parker worked with the steel suppliers before the material was released and made the required changes to prevent delivery delays.
- Collaborated with third-party buying house to ensure customer's onboarding process wasn't delayed.
- With our precision, high-end, latest technology CNC machinery, we were able to ensure zero NCR's and full conformity to OEM specifications.

Results:

- Premium X-Over Subs were delivered on time and met the customer's job requirements.
- Delivered within AFE budget of project.
- Zero NCR's with full conformity to OEM Specifications.

Energy. Well engineered.
